Enterprise and Engagement*

TAUGHT MASTERS

WE HAVE A RANGE OF TAUGHT MASTERS AT LEVEL 9

Social Practice & The Creative Environment (Master of Arts) LSAD, Clare Street

MA SPACE, the most dynamic postgraduate programme on offer in Ireland in Art and Design. Creativity, theory and practice converge preparing graduates for the demands of real world engagement. Open to graduates from varied backgrounds and experience.

Art & Design Education (Master of Arts) LSAD, Clare Street

A part-time, online MA (with some college-based workshops) that operates as a community of practice by means of social networking, promoting innovative approaches to art and design education, professional development and a re-engagement with personal art/design work.

Analytical Science, Research & Quality Mgt. (Master of Science) Moylish

This programme is aimed at learners from both an industrial and academic background and provides a broad and forward looking education with the knowledge and skills necessary to excel in industry, business and research associate roles.

Security & Digital Forensics (MSc in Computing) Moylish

This programme provides the knowledge and practical skills to secure and protect computer network systems and investigate computer crime. The programme employs core cryptographic principles and digital forensic techniques and tools.

Marketing & Management Strategy (Master of Business) Moylish

This programme is designed to cultivate strategic thinkers with extensive high-level marketing and management knowledge and practice. Opportunities will be provided to engage in marketing and management problems in several organisations, through the use of Problem Based Learning (PBL). Programme available on a full-time and part-time (evening) basis.

Business Management (Higher Diploma - Level 8) Moylish

This one-year postgraduate programme is aimed at providing business management skills for students who would have studied in other academic fields at undergraduate level. It provides the opportunity to the student to convert from other disciplines into the business world or augment their existing qualifications to improve employment prospects.

Management Practice (Master of Business) Thurles

Designed in consultation with industry this program will challenge business managers and graduates alike to rethink and reinvent traditional theories and practices to ensure business survival in the 21st century. The LIT Tipperary student experience offers excellent support with a friendly and constructive learning environment.

Quantity Surveying (Master of Science) Moylish

Accelerate your career with a Masters in Sustainable Public Building, Sustainable Civil Engineering or Sustainable Mechanical & Electrical Engineering. Programmes designed with Industry Partners. Career development focused. Open to non-Built Environment graduates as well.
