

ManagEnergy [Support Initiative to Assist Actors Working on Sustainable Energy at the Local and Regional Level]

Duration: 36 Months [June 2017 – June 2020]

LIT Project Budget: €330,000

Total Project Budget: €700,000

Summary:

The new ManagEnergy is an European Commission initiative dedicated to regional and local energy agencies with the objectives of assisting them in becoming leaders in the energy transition and of increasing sustainable energy investments in regions and cities.

There is a wide consensus that more energy efficiency and renewable energy investments are needed and that the regional/local level is key to making these investments happen. ManagEnergy provides information, know-how, visibility and networking opportunities and supports local and regional energy agencies in delivering new services or boosting existing ones. Energy agencies are in a unique position to support energy transition in their regions and cities in their role of project developers, aggregators and facilitators for public authorities and this places them at the forefront of energy investments in Europe.

Objectives and aims of the project

In the next 3 years the ManagEnergy initiative has a strong focus on sustainable energy investments. A completely new website, social media and communication tools will inform sustainable energy actors on the most recent developments in the area of energy efficiency policies and financing opportunities. Master classes, expert missions (peer-to-peer coaching hosted by energy agencies and their stakeholders) and other events in Brussels will raise the skills of local and regional energy agencies in energy efficiency, financing and project development.

LIT Activities (Development Unit):

- LIT will lead the project and is responsible for project implementation, management, coordination and reporting to the EU Commission.
- LIT will lead the development and delivery of 8 Master Classes, to be held in Brussels, supporting 200 participants to gain knowledge, skills and sustainable energy project financing, and investment.
- LIT will contribute trainers and experts to the training initiatives and Expert Missions.
- LIT will support the promotion and dissemination of all project outcomes.
